All releases of AutoCAD have supported 32-bit/64-bit Windows for at least two releases. Third, 64 bit Windows was the more attractive and more commonly used Windows operating system from the time of release of AutoCAD. The 64 bit release of Windows operating system was the most desirable and preferred choice of 64-bit Windows computer systems by all users of AutoCAD. The last and most important reason why all the releases of AutoCAD have supported 32 bit / 64 bit Windows computers was that they were aware of the fact that there was a huge potential for growth of AutoCAD to support a wide range of computer systems. The growth of AutoCAD from the first release was phenomenal and the wide range of computer systems that were capable of running AutoCAD was also phenomenal. The AutoCAD 2010 release was the first time that AutoCAD supported more than 64 bit Windows operating system. The AutoCAD 2010 release was the first time that a user of AutoCAD 2010 could use 64 bit Windows operating system.
